NOTES: All 1992-1993 data are national estimates derived from samples representing the 565 largest research-performing U.S. universities and colleges; all previous years data represent 525 institutions.

Findings are limited to projects with estimated total costs at completion of \$100,000 or more for research space. Estimates are prorated to reflect all research component because of rounding, components may not add to totals.

Dollar amounts are reported in current dollars, unadjusted for inflation. See Table A-5 in the Technical Notes for the inflation adjustment used in Volume I of this report.
